

# PDA China – YES or NO

Still not clarified is the situation about PDA China – is it already existing or not. We checked with PDA Europe and got confirmation that foundation of PDA China is not yet finalized, although a list of board

members has been mailed already around the world. Soon Lee Hanson (Int. Director of the “future” PDA China) and Lee Bower (Alliance Director, PDA China) will meet Prof. Weibo Huang (President PDA China) to

discuss organization and guidelines for PDA China. More information will be available after this meeting.

## Advanced Applicator School for Polyurea

You are already experienced in polyurea spraying or have successfully passed the 1. Applicator Spray Course and want to get a higher level of knowledge you should attend.

**When: 23<sup>rd</sup> – 24<sup>th</sup> April, 2009 (9:00 am – 5:00 pm)**

Where: Congress Center Villach, Austria  
Trainer: Dudley J. Primeaux II  
Language: English (translation to German language through cert. translator)  
„PolyVers School“, represented by Mr. Lee Bower, is doing first time in Europe an „Advanced Applicator School“ for polyurea processors.

This training is an outstanding possibility, to learn more about machinery, technical details about coating-equipment like units, drum-pumps and spray guns and spraying-procedures on different substrates. Join us to go to a higher level with more background-knowledge and be more successful out in the field!

### Recommended for:

- All applicators, who passed the spray course – part 1 and still are out in the field with coating-jobs
- All applicators, who still are out in the field with coating-jobs, did not passed the spray course – part 1 but have had a basic training based on part 1 spray course
- All applicators, who wants to know more about machinery, troubleshooting, and repairs of the equipment
- All applicators, who wants to learn more about successful coatings
- All applicators, who wants to be more autonomous (technical assistance) in the field. This course is a theoretical course with practical sessions directly on the units, guns, hoses, and pumps!

### Course content:

#### Introduction

1. Course objectives
2. Simple review of Phase 1 class work

#### Proportioning Pumps

1. How the pumps work and why
2. How to troubleshoot the pumps
3. How to repair / replace pumps
4. Proper system flush procedure
5. Material supply pumps working and repair

#### Spray Hoses

1. Proper sizing / staging
2. Troubleshooting hose heat

#### Spray Guns

1. Proper modules chambers – air & mechanical purge
2. Proper maintenance
3. Easy rebuild
4. Spare parts on hand

### Installation Procedures

1. Assume that surface preparation proper and complete
2. Acceptance of substrate for work
3. Surface area and profile vs. volume required
4. When to spray, and when not!

### Concrete Substrates

1. Recognition of substrate
2. Use of primer – methods / techniques of application
3. Test primer of coatability / re-coat window

### Steel Substrates

1. Acceptance of substrate
2. When to use a primer
3. When not to coat steel

### Other Substrates

#### Proper Lighting – Often Overlooked!

1. During Application
2. Inspection

### Blisters – Striping

1. Recognition of cause
2. Repair

### Work Documentation

Price / participant: 950.00 Euro excl. VAT  
Price includes participation, a daily lunch-break with buffet and drinks and also coffee-breaks on both days.

Group-limitation: 15 persons (minimum amount of participations 10)

More information and registration under:  
[www.fastsetpowerunits.eu/advanced\\_spray-course\\_anmeldung/kontakt.php](http://www.fastsetpowerunits.eu/advanced_spray-course_anmeldung/kontakt.php)  
The organizers are also planning a polyurea spraying exhibition during this event. Interested to participate? Details are available (exhibitors and visitors) under above mentioned link.
